

PLASTICS				
Material	Icon	Durability	Max Temp.	Description
ACRYLIC		Highly Break Resistant	185°F/85°C	A very hard plastic that is favored when looks count. This clean and cost effective option is popular for a variety of uses.
ABS		Unbreakable	198°F/ 92°C	Tough, durable, and perfect when used for hard-wearing foundation purposes. Incredible strength in multiple aesthetic options.
POLYCARBONATE		Unbreakable	270°F/132°C	Unbreakable and looks great. A slightly softer material that is perfect for spoons and tongs.
PETG		Unbreakable	160°F/71°C	Specifically used when you need an unbreakable, clear material in a more industrial application.
MELAMINE		Break Resistant	248°F / 120°C	Beautiful finish and easy on the budget. Our Melamine is a pure blend of components in a wide variety of colors, finishes and styles.

METALS		
Material	Icon	Description
STEEL		Delfin Steel products are crafted without compromise. Using a superior grade of steel and premier engineering and craftsmanship, our Steel lines are unsurpassed in quality and style.
STAINLESS STEEL		Our sleek Stainless Steel products complement many of our contemporary items. Combining the beauty of Stainless with creative design, these products are both functional and stylish.

DELFINGREEN				
Material	Icon	Durability	Max Temp.	Description
BAMBOO		Break Resistant	-	Manufactured from mature, panda-friendly Moso Bamboo, these cool and stylish delfingreen items are protected with a durable FDA and CEN compliant lacquer coating.
ECO MELAMINE		Break Resistant	248°F / 120°C	By perfectly blending eco-friendly plant based fiber from Thailand and durable Melamine compound designed for strength, ECO Melamine items offer a durable yet natural, earthen look.
